PROFILE

Software Engineering Technology graduate from IPB University with a broad foundation in Information Technology, spanning web application development, backend systems, databases, and API integration. Experienced in building software across the full development lifecycle, from designing user interfaces to implementing server-side logic and working with relational databases. Adaptable and eager to contribute across different areas of IT, with a strong ability to learn new tools, frameworks, and technologies quickly. Passionate about problem-solving, collaborative teamwork, and delivering reliable, well-structured technical solutions.

EDUCATION

IPB University ***August 2022 - August 2026***
Bachelor of Applied Science in Software Engineering Technology
GPA: 3.58/4.00

EXPERIENCE

Diskominfo Internship ***July – December 2025***
- Contributed to the development and implementation of web-based applications within the APTIKA Division using Laravel and Flask.
- Built and maintained application features across both front-end and back-end layers, gaining hands-on experience with the full web development lifecycle.

Himavo Micro IT ***November 2023 - October 2024***
- Actively contributed across 135 learning hours to web project management and development, collaborating within teams using strong problem-solving and critical-thinking skills.

PROJECTS

Smart Monitoring – City Smart Monitoring Website ***July – December 2025***
Stack: Flask, PostgreSQL | Role: Full-Stack Developer
- Developed a web-based smart monitoring application for monitoring CCTV feeds and presenting monitoring information to support city surveillance activities, as part of the Diskominfo Internship.

Scanmask – AI-Powered Mask Detection Platform ***January – June 2025***
Stack: Flask | Role: Front-End Developer
- Developed a web-based platform for detecting mask usage through cameras, identifying proper mask usage, absence of a mask, and incorrect mask placement.

Yuma Laundry – Laundry Service Company Website ***August – December* 2024**
Stack: Laravel, MySQL | Role: Front-End Developer
- Developed a company profile website for a laundry service business, providing information about available services and pricing, with direct WhatsApp integration for customer orders.

Febri Lestari – Financial Record-Keeping Website ***January – June 2024***
Stack: Native PHP, MySQL | Role: Full-Stack Developer
- Developed a web-based financial record-keeping system for store administrators to record and manage daily income and expenses digitally.

Bogor Cinemap – Cinema Locator Platform in Bogor ***January – June 2024***
Stack: HTML, CSS, JavaScript | Role: Front-End Developer
- Developed a digital platform that provides information about cinemas in Bogor, including their locations and details.

Buahku – Fruit E-Commerce Website ***August – December 2023***
Stack: CodeIgniter, MySQL | Role: Front-End Developer
- Developed an e-commerce website for purchasing fruits, featuring a filtering system that recommends suitable fruits based on the user's geographical location.

PUBLICATIONS

Blackbox Testing of the Garuda Farm Website Using the Equivalence Partitioning Technique ***December 2024***
Jurnal Kridatama Sains dan Teknologi

TRAINING

Spring Boot 3 Essential Training – LinkedIn Learning ***August 2026***
- Built production-ready backend services using Spring Boot 3, implementing REST APIs, Dependency Injection, and

data persistence with Spring Data JPA.

Advanced Java Programming – LinkedIn Learning ***August 2026***

- Mastered advanced Java concepts including Generics, Collections Framework, Stream API, Lambda expressions, and multithreading for robust application development.

Programming Foundations: APIs and Web Services – LinkedIn Learning ***August 2026***

- Learned RESTful API architectures, HTTP request-response workflows, JSON data handling, and secure web service integrations.

JavaScript Essential Training – LinkedIn Learning ***August 2026***

- Deepened fundamental JavaScript knowledge covering DOM manipulation, event-driven programming, and modern scripting practices for web development.

Programming Foundations: Databases – LinkedIn Learning ***August 2026***

- Gained foundational knowledge in relational database design (RDBMS), SQL query operations, table relationships, and data normalization.

Figma for UI/UX Design – MySkill ***February 2024***

- Learned UI/UX principles and applied Figma to design responsive, user-friendly interfaces.

SKILLS

Programming & Web: JavaScript, TypeScript, Java, PHP, Python, HTML, CSS

Frameworks & Libraries: Next.js, React, Tailwind CSS, Bootstrap, Spring Boot, Laravel, Flask

Databases: MySQL, PostgreSQL, Relational Database Design

Tools & Practices: Git, GitHub, Postman, RESTful APIs, Figma, UI/UX Design, Software Testing, Agile Collaboration
